Document ID: ML-SAF-2024-ANNUAL

Date of Issue: January 15, 2025

Revision: 1.0 (Final)

OSHA Compliance Summary — 2024

1. Overview

This document provides a high-level summary of safety incidents recorded across all facilities during 2024. The purpose of this report is to support internal review and regulatory compliance documentation. It consolidates data from the four primary operational sites (Facilities A through D) to provide a comprehensive view of safety performance, training efficacy, and corrective action outcomes for the fiscal year.

2. Incident Statistics

The following metrics summarize the reportable safety events for the 2024 calendar year:

14

TOTAL REPORTABLE INCIDENTS

3

LOST-TIME INCIDENTS

11

RECORDABLE INCIDENTS

22

DAYS AWAY FROM WORK

37

RESTRICTED WORK DUTY DAYS

3. Incident Breakdown by Facility

Facility	Number of Incidents
----------	---------------------

Facility A	5
------------	---

Facility B	4
------------	---

Facility C	3
------------	---

Facility D	2
------------	---

4. Near-Miss Reports

A total of **31** near-miss reports were submitted and reviewed during 2024. Proactive reporting of near-misses is a key indicator of a healthy safety culture. The most common categories identified were:

- **Slip and fall:** 8 reports
- **Lifting strain:** 7 reports
- **Equipment contact:** 6 reports
- **Electrical exposure:** 4 reports

5. Root Cause Analysis

The most frequent root causes identified in 2024 were inadequate housekeeping, insufficient task training, and delayed equipment maintenance. Corrective actions have been assigned to the responsible department leads. The Safety Committee has monitored the implementation of these actions throughout Q4 2024 to ensure sustained compliance and prevention of recurrence.

6. Corrective Actions

The following specific measures were implemented or updated in response to the identified root causes:

- Updated housekeeping checklist for all warehouses to include specific thresholds for aisle clearance and debris removal.
- Additional forklift operator refresher training sessions conducted for all certified operators at Facilities A and B.
- Maintenance ticket response time reduced from 72 hours to 48 hours for critical safety-related equipment.
- New PPE inspection procedure implemented, requiring daily pre-use checks for hard hats and high-visibility gear.

7. Training Hours

Meridian Logistics prioritizes continuous education to mitigate risk. The training metrics for 2024 are as follows:

- **Total safety training hours delivered:** 1,240
- **Average hours per employee:** 4.8
- **New hire safety onboarding completion rate:** 98%

8. Equipment Inspections

Regular inspections are conducted to ensure all operational equipment meets safety standards. The 2024 inspection summary includes:

- **Forklifts inspected:** 24
- **Fire extinguishers inspected:** 86
- **Emergency exits checked:** 112
- **Inspection compliance rate:** 96%

9. Employee Reporting

Employee engagement in hazard identification is critical. The following statistics reflect the volume and resolution time of hazard reports:

- **Employee-reported hazards:** 47
- **Management-reported hazards:** 19
- **Time to acknowledge report:** 1.2 days average
- **Time to close report:** 9.4 days average

10. Regulatory Correspondence

Interaction with regulatory bodies during the 2024 period is summarized below:

- **OSHA inspection notices received:** 1
- **OSHA citations issued:** 0
- **Voluntary compliance agreements:** 2

Appendix A: Incident Log Summary

Date	Type	Severity	Status
Jan 14	Slip	Recordable	Closed
Feb 03	Lifting	Lost-time	Closed
Mar 22	Equipment	Recordable	Closed
Apr 09	Electrical	Near-miss	Closed
May 17	Slip	Recordable	Closed
Jun 30	Lifting	Lost-time	Closed
Jul 11	Housekeeping	Recordable	Closed
Aug 25	Equipment	Lost-time	Closed
Sep 04	Slip	Recordable	Closed
Oct 18	Electrical	Recordable	Closed
Nov 02	Lifting	Recordable	Closed
Dec 09	Housekeeping	Recordable	Closed
Dec 15	Slip	Near-miss	Closed

Date	Type	Severity	Status
------	------	----------	--------

Dec 20 Equipment Recordable Closed

Appendix B: Notes on Methodology

Incident data was collected from the internal safety management system. Dates reflect the date of the incident, not the date of reporting. Severity classifications follow OSHA definitions. All near-miss reports were reviewed by the safety committee before inclusion in this summary. Data integrity was verified by the Safety Department Lead prior to finalization of this document.
