

2025 Strategy Roadmap

Document		Classification:			Internal
Prepared	For:	CEO	Offsite	Planning	Session
Date:	December				2024
Version:	1.0		(Final		Draft)
Owner: Office of the Chief Strategy Officer					

Prepared for the CEO offsite planning session.

Overall theme: consolidate the 2024 customer wins into a 2025 operating plan with clear owners and milestones.

As we transition from the execution phase of 2024 into the strategic planning cycle for 2025, it is imperative that we leverage the momentum generated by our recent customer acquisitions and retention successes. The primary objective of this roadmap is to translate these market wins into a sustainable, scalable operating model. By defining clear accountability structures and measurable milestones, we aim to ensure that our growth is not only rapid but also financially disciplined and operationally robust. This document outlines the critical workstreams, quarterly targets, and resource requirements necessary to achieve our fiscal year 2025 goals.

1. Strategic Workstreams

The 2025 operating plan is built upon three core pillars, each with designated leadership and specific key performance indicators (KPIs).

1.1 Customer Growth

This workstream focuses on expanding our addressable market while deepening relationships with existing enterprise accounts. Key initiatives include launching the new mid-market tier, expanding our regional sales footprint in the APAC region, and implementing a unified customer success platform to reduce churn. The goal is to increase net revenue retention (NRR) to 125% by the end of Q4.

1.2 Product Reliability

Building on the foundation of our 2024 service level agreements (SLAs), the product team will prioritize infrastructure stability and feature consistency. This includes migrating legacy

components to the new cloud-native architecture, reducing mean time to recovery (MTTR) by 30%, and ensuring 99.99% uptime for all core services. Reliability is identified as the primary driver for customer trust and long-term contract renewals.

1.3 Cost Optimization

To support aggressive growth without diluting margins, the finance and operations teams will execute a comprehensive cost-optimization program. This involves renegotiating vendor contracts, automating manual operational processes, and right-sizing our data center and cloud resource consumption. The target is to reduce operating expenses (OpEx) as a percentage of revenue by 5% year-over-year.

2. Quarterly Milestones

The following timeline details the critical deliverables and checkpoints for each quarter. These milestones will be reviewed during the monthly executive leadership meetings and the quarterly board updates.

Quarter	Primary Focus	Key Deliverables
Q1	Foundation & Planning	Finalize operating model and resourcing plan. Complete organizational restructure for sales and support. Launch new pricing tier beta.
Q2	Product & Market Launch	Ship reliability improvements and pricing updates. Begin APAC sales expansion. Complete mid-market onboarding workflow automation.
Q3	Efficiency & Scale	Complete cost-optimization wave one. Achieve 99.99% uptime target. Launch new customer success portal.
Q4	Review & Future Planning	Year-end review and 2026 planning inputs. Finalize budget allocation for FY2026. Conduct strategic retrospective on FY2025 KPIs.

3. Resource Requirements & Risks

Successful execution of this roadmap requires a headcount increase of 15% in engineering and 10% in customer success. We anticipate potential risks related to talent acquisition in the competitive tech market and supply chain delays for hardware components. Mitigation strategies include offering competitive equity packages and establishing dual-source vendor relationships.

4. Governance & Review Process

This roadmap is a living document. Progress will be tracked via a centralized dashboard accessible to all executive team members. Any deviations from the planned milestones exceeding 10% variance will trigger an immediate review by the Chief Strategy Officer and the CEO. Regular check-ins will be held bi-weekly to ensure alignment across departments.

Revision History

Version	Date	Author	Description
0.1	Nov 15, 2024	Strategy Team	Initial draft outline.
0.2	Nov 28, 2024	Strategy Team	Incorporated feedback from CFO and CTO regarding cost targets.
1.0	Dec 05, 2024	CSO Office	Final version approved for CEO offsite distribution.
